Plug Wiring (UK)

This appliance is fitted with a BS1363 13 amp plug. If you have to replace the fuse, only those that are BSI approved to BS1362 and with a rated current of 13 amps should be used. Spares fuses are available from electrical stores. If the plug outlets in your home are not suitable for the plug of this product, the plug must be removed and disposed of safely as insertion of the plug into a socket is likely to cause electric hazard.

A replacement plug should be wired according to the following instructions. If in doubt, contact a qualified electrician.

This appliance must be earthed. The wires in the cord set are coloured in the following way: **BLUE-NEUTRAL, BROWN-LIVE, GREEN&YELLOW-EARTH**

- The wire that is coloured blue must be connected to the terminal that is marked with the letter N.

- The wire that is coloured brown must be connected to the terminal that is marked with the letter L.

- The wire that is coloured green & yellow must be connected to the terminal in the plug that is marked with the letter E or marked with symbol.

If the supply cord is damaged a qualified person must replace it in order to avoid a hazard.

Environment

The "crossed-out wheeled bin" symbol indicates that this product can be recycled. Do not dispose of with household waste. Please take the Steam Mop to your local refuse/collection site centre. If you are unsure of where you local refuse centre is please contact your local authority.
Safety instructions

WARNING: Read all safety warnings and all instructions. Failure to follow the warnings and instructions listed below may result in electric shock, fire and/or serious injury.

Warning: When using electrical appliances, basics safety precautions, including the following, should always be followed to reduce the risk of fire, electric shock, personal injury and material damage.

● Read all of this manual carefully before using the appliance.
● The intended use is described in this manual. The use of any accessory or attachment or the performance of any operation with this appliance other than those recommended in this instruction manual may present a risk of personal injury.
● Retain this manual for future reference.

Using your appliance

● Do not direct steam at people, animals, electrical appliances or electrical outlets.
● Do not expose to rain.
● Do not immerse the appliance in the water.
● Do not leave the appliance unattended. Keep children away from unit while in use.
● Do not leave the appliance connected to an electrical outlet when not in use.
● Never pull the power cord to disconnect the appliance from the socket. Keep the appliance cord away from heat, oil and sharp edges.
● Do not handle steam cleaner with wet hands.
● Do not pull or carry by cord, use cord as a handle, close door on cord, pull cord around sharp corners or expose cord to heated surfaces.
● Do not use appliance in an enclosed space filled with vapor given off by oil-base paint thinner, some moth-proofing substances flammable dust, or other explosive or toxic vapors.
● Do not use on leather, wax polished furniture or floors, synthetic fabrics, velvet or other delicate, steam-sensitive materials.
● Do not use on any unsealed hard floor surfaces. Additionally, on surfaces that have been treated with wax or some no-wax floors, the sheen may be removed by the heat and steam action. It is always recommended to test an isolated area of the surface to be cleaned before proceeding. We also recommend that you check the use and care instructions from the floor manufacturer.
● Never put de-scaling, aromatic, alcoholic or detergent products into the steam mop, as this may damage it or make it unsafe for use.
● If the circuit breaker activates while using the steam function, discontinue product use immediately and contact the customer support center.(Beware of the risk of electrical shock.)
● The appliance emits very hot steam to sanitize the area of use. This means that the steam head and cleaning pads get very hot during use.

Caution: Always wear suitable shoes when using your steam mop and when changing the accessories on your steam mop. Do not wear slippers or open-toed
footwear.
● The lid may become hot during use.
● Care should be taken when using this appliance. DO NOT touch any parts which may become hot during use.
● Do not use when micro-fiber cleaning pad not install correct.

Safety of others:

● This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliances by a person responsible for their safety.
● Children should be supervised to ensure that they do not play with the appliance.

Safety Guidelines-Definitions

It is important for you to read and understand this manual. The information it contains relates to protecting YOUR SAFETY and PREVENTING PROBLEMS. The symbols below are used to help you recognize this information.

! DANGER: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

! WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

! CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

NOTICE: Used without the safety alert symbol indicates a potentially hazardous situation which, if not avoided, may result in property damage.

Residual risks:

Additional residual risks may arise when using the tool which may not be included in the enclosed safety warnings. These risks can arise from misuse, prolonged use, etc. Even with the application of the relevant safety regulations and the implementation of safety devices, certain residual risks cannot be avoided. These include

● Injuries caused by touching any moving parts.
● Injuries caused by touching any hot parts.
● Injuries caused when changing any parts or accessories.
● Injuries caused by prolonged use of the appliance. When using any appliance for prolonged periods ensure you take regular breaks.
Standard Features

15 Water tank
Function and specification

Function
- Adjustable steam amount;
- folding holder;
- The split-type design;
- removable water tank;
- the handle bracket is configuration of steam button;
- continuous steam output(up to 5 minutes continuously working, the steam averaged): 20-35g / min;
- Steam output time: 20 minutes
- With a warm and dry indicator, when the appliance is connected to power supply, and when the water tank is empty, the indicator is in red light;
- pressure relief protection, keeping the pressure in the heating unit constant;
- the angle of the rotation axis in the cleaner is greater;
- Comprehensive accessories configuration;

Specification
- Rated voltage: 220-240V
- Rated frequency: 50Hz
- Output power: 1500W (+5%,-10%)
- water tank capacity: 350ML
- Waterproof level: IPX4

ASSEMBLY

NOTE: Each steam mop is 100% tested in the factory to ensure product performance and safety. When assembling your new steam mop for the first time you may notice water residue inside of the unit.

WARNING: Before attempting any of the following operations, make sure that the appliance is switched off and unplugged and that the appliance is cold and contains minimal or no water.

CLEANING AND MAINTENANCE

BE SURE THAT THE UNIT IS DISCONNECTED FROM THE POWER OUTLET WHEN PERFORMING CLEANING
Drain the remaining water in the tank and clean the tank after every use.
Please use detergent to clean the accessories (Jet Nozzle and Round Brush) when they are dirty then wash with cleaning water and air dry

How to decalcify the Water Tank interior
To clean calcium deposits that build up inside the Water Tank, add one or two tablespoons of white vinegar to a full Water Tank close the Water Tank Cap and then shake the contents. DO NOT TURN THE STEAMER ON.

Cleaning procedure to remove lime scale
If your steam mop begins to produce steam more slowly than usual or stops producing steam, you may need to remove lime scale. Lime scale can develop over time on the metal parts and greatly affect mop performance.

It is necessary to remove lime scale on regular basis every 25-50 times you use a full tank of water or at least once a month, especially in areas with hard water.

The frequency of lime scale removal depends upon the hardness of you tap water and how often you use the steam mop.

By using cleaning solution
1. Prepare a solution of 1/3 white vinegar and 2/3 tap water and add to the water tank.
2. Secure and position the unit to ensure steam released is aimed away from the floor or surrounding objects and surface. Plug the unit in, turn the unit ON by pressing the power switch, and allow the unit to produce steam until the vinegar/water solution is used up.
3. Repeat the above procedure as many times as necessary until a normal steam flow rate is achieved.
4. Fill the water tank with fresh water and rinse our.
5. Fill the water tank with fresh water, attach to the unit and release steam through the system until the water tank is empty.
WARNING

Don't leave the steamer unattended during the lime scale removal process and/or while in use

NOTICE:
Preform a test cleaning on a suitable isolated area after each lime scale removal to ensure that there is no debris left in the system.

Cleaning blocked steamer accessories

Due to the high mineral content of water in some areas, you may notice that less steam comes out from the Hand-Held steamer accessories.

This may be caused by calcium buildup inside the tip of the nozzle.

How to cleaning calcium buildup
We recommend using a spray lubricant. Spray a small burst or two of the lubricant inside the tip of the Jet Nozzle. After spraying lubricant inside the component, till the steamer with water according to the directions and run a continuous jet of steam through the affected accessory for several minutes to remove the deposit once the steam pathway is clear, aim the steamer at a neutral surface or cleaning cloth to make sure no debris is emitted.

This product contains no serviceable parts. Do not try to repair it yourself. Any servicing that requires disassembly other than cleaning must be performed by a qualified appliance repair technician.

ALL servicing should be done by an authorized service representative.

CLEANING MICROFIBER PAD
- Machine washable on "warm" setting. Always use a mild detergent.
- For best care results, lay flat to dry
- IMPORTANT: Allow the steamer to fully cool down before performing any maintenance or troubleshooting checks.
- IMPORTANT: Never use bleach or fabric softener when washing the microfiber cleaning pad.

STORAGE
- After the steamer is used, turn power off and then unplug the power cord.
- Take out the water tank, and empty the residual water in the tank and clean the external surface with a dry cloth. Until the steam mop cools down, clean appliances
- Remove the cleaning pad and wash it so that it will be ready for next use.
- Hang the power code in the cord hold, press spindle button, and fold the holder. Then rotated cord hold 180°to prevent cord drop.
- Store product in a protected, dry area. Keep water funnel and measuring cup for future use.
- Keep out of reach of children.

**NOTICE:** After cleaning, take out the water tank before cut off the power, and then let the product work for a while, until there is no steam. It can make pipe without water, good to store.

**TROUBLESHOOTING**

USE TROUBLESHOOTING GUIDE AS A FIRST STEP TO RESOLVE ANY PROBLEMS YOU MAY BE EXPERIENCING.

**WARNING:** TO REDUCE RISK OF PERSONAL INJURY-UNPLUG STEAMER BEFORE SERVICING AND ALLOW TO COOL
